Subject Index

A

Acetylcholine –
  nucleus basalis of Meynert 264
  turnover: mediation by GABA system 13
Acetylcholine receptors, nicotinic 73
Acoustic neuromas 22
Adhesion molecules –
  and growth cone movement 333
  in *Drosophila* 472
Adrenergic receptors, molecular biology of 321
Alzheimer, Alois, 256(L)
Alzheimer's disease –
  and β-carbolines 13
  and Down syndrome 390
  β-carboline treatment 208(L)
  genetics of 293
Amacrine cells, classes of 405
Amino acid receptor nomenclature 17(L)
Amnesia, anatomy of memory impairment 170
Amyloid protein, and Alzheimer's disease 293
Amyotrophic lateral sclerosis (ALS), environmental aetiology 51
Anatomical changes in learning and memory 142
Animal models –
  Duchenne muscular dystrophy 480
  neurodegenerative disorders 89, 390
Aplysia, associative learning in 128
Arachidonic acid metabolites, and ion channel modulation 232
Arousal, nucleus basalis of Meynert 264
Associative learning –
  eye-blink reflex 152
  in *Aplysia* 128
  in *Hermissenda* 136
ATP-driven calcium pumps, in calcium buffering 438
Atrial natriuretic factors in brain 58
Auditory system –
  in insects 267
  regeneration 339, 533(L)
Autoimmune disease 43
Axon outgrowth, regulation of 183, 363
Axonal pathfinding –
  environmental cues 333
  in zebra fish 18
Axonal regeneration, in vertebrates 94
Axoplasmic transport, and the cytoskeleton 248

B

Barrel fields, variable mapping of 549
Basal forebrain cholinergic system 264
Becker muscular dystrophy, molecular biology of 480
Behavior –
  command hypothesis 506
  ion channel control of 558
Behavioral mutants in *Paramecium* 27
Benzodiazepines –
  action of β-carbolines 13
  effects on circadian clock 535
  endogenous 100(L), 489(L)
Beroë, ion channels and behavior 558
Blood flow, PET studies 203
Brain-derived neurotrophic factor (BDNF) 243, 343
Buffering of calcium in neurons 438

C

Caenorhabditis elegans, development of 259
Cajal, and the retina 521
Calciosome 449
Calcium –
  activation of phospholipase C 517
  and LTP 156
  and neurotoxicity 465
  and neurotransmitter release 485
  and synaptic vesicle-associated proteins 241
  buffering 438
  distribution 449
  homeostasis and inositol phosphates 444
  interaction with potassium channels 270
  measurement of cytosolic 419
  regulation of neuronal growth cone 315
  signals in neurons 415
Calcium-activated non-specific cation channels (CAN) 69
Calcium-binding proteins, and exocytosis 458
Calcium channels –
  and $GABA_B$ receptors 112
  in *Paramecium* 27
  modulation of 431
  molecular biology of 425
  ryanodine-sensitive 453
  structure 1, 90
Caliphora erythrocephala, visual orientation in 351
Calmodulin, in calcium buffering 438
β-Carbolines, and Alzheimer's disease 13
Cardiovascular functions, role of ANF 58
Cation channels, calcium-activated non-specific 69
Cats, spatial vision in 78
Cell adhesion molecules –
  and neurite extension 183
  in *Drosophila* 472
Cell death –
  calcium-mediated 465
  in developing neocortex 92
Cell fate determination, in *C. elegans* 259
Cell lineage, chimaeras 46
Central pattern generators (CPG), and functional regeneration in lamprey 227
Cerebellum, and motor learning 147, 152
Channels, see Ion channels
Chemotaxis in *Paramecium* 27
Chloride channels, and $GABA_A$ receptors 112
Chordotonal organs, differentiation of 515
Ciliary neurotrophic factor (CNTF) 243, 343
Circadian clock, benzodiazepine effects on 535
Cognition –
  and connectionism 195
  and neuroscience 304
Cognitive psychology, and memory 176
Command neurons 506
Conditioning –
  classical, cellular basis 128, 136
  eye-blink reflex 152
Confocal microscopy 346
Connectionism –
  and human language 195
  and Warren McCulloch 9
Cortex –
  motor 501
  visual 219, 380, 394
Crayfish, command hypothesis 506
Crickets, auditory system 267
cut mutation 515
Cycad, role in ALS and PD on Guam 51
Cytochrome oxidase, visual cortex staining 380
Cytoskeleton –
  and axoplasmic transport 248
  neurofilament phosphorylation 291
  RNA transport in dendrites 342

D

Dendrites –
  development in retinal ganglion cells 87
  RNA transport in 342
Dendrotoxin, potassium channel blocker 186
Development –
  axonal pathfinding in zebra fish 18
  cell fate in *C. elegans* 259
  Drosophila nervous system 101, 378, 400
  growth cone navigation 315, 333, 472, 541
  homeobox expression in CNS 190
  ion channel plasticity in immune system 214
  mammalian CNS 46
  neural differentiation 515
  neurite outgrowth 183
  neurotrophic factors 243, 343
  NGF 299
  of neocortex 92
  of somatosensory maps 549
  plasticity of MAP expression 477
  retinal ganglion cells 87
  sexual differentiation of social play 54
  synaptogenesis 363
Diazepam, in brain 489(L)
Dihydropyridine-sensitive calcium channel –
  molecular biology of 425
  structure of 1, 90
Dopamine receptors, measured with PET 203
Down syndrome –
  and Alzheimer's disease 293
  and trisomy 16 mouse 390
Drosophila –
  adhesion molecules in 472
  homeobox 190
  neural development 101, 378, 400, 515
  Shaker mutation 185
Duchenne muscular dystrophy (DMD) –
  animal model of 89
  molecular biology of 480

Dyes, for calcium measurement 419

E

Ear, hair cell regeneration 339, 533(L)
Electrosensory system, regeneration 533(L)
End-inhibition, in LGN 192
Endoplasmic reticulum, smooth, in calcium buffering 438, 449
Environmental neurotoxin, *Cycas circinalis* 51
Epilepsy –
  generalized 63
  kindling 33
  seizure mechanisms 375
Excitation–contraction coupling –
  and dihydropyridine receptor 425
  and ryanodine receptor 453
Excitation–secretion coupling, role of CAN channels 69
Excitatory amino acid receptors –
  activation of inositol phosphates 545
  activation of phospholipase C 517
  calcium-mediated neurotoxicity 465
  spider toxins affecting 278
Exocytosis, role of calcium in 458
Eye movements –
  smooth-pursuit 394
  vestibulo-ocular reflex 147
Eye-blink reflex, conditioning of 152

F

Fasciclins 333, 472
Fasciculation, and neurite extension 183
Fibroblast growth factor (FGF) 243, 343
Flies, (see also *Drosophila*) visual orientation in 351
Flocculus, in vestibulo-ocular reflex 147
Fluorescent indicators, for calcium measurement 419
Food intake, and brain insulin 107
Friedreich's ataxia 479
FRMF amide, and ion channel modulation 232
Frontal cortex, and schizophrenia 367
Fura-2 419

G

G proteins –
  and adrenergic receptors 321
  control of M-current 294
  phosphoinositide hydrolysis 117, 517, 545
  ras proto-oncogene 287
  signal transduction 3
GABA antagonists, in AD treatment 13, 208(L)
GABA receptors, electrophysiology of subtypes 112
Ganglion cells, retinal 87
Genetic disease –
  Alzheimer's disease 293, 390
  animal models 89
  Becker muscular dystrophy 480
  Down syndrome 390
  Duchenne muscular dystrophy 480
  Friedreich's ataxia 479
  neurofibromatosis 22
Glia, NGF receptors on Schwann cells 299
Glia-derived nexin, and neurite extension 541
Glial growth factor (GGF), and neural tumors 22
Glial tumors, molecular biology of 22
Glutamate neurotoxicity 465
Glutamate receptor –
  activation of inositol phosphates 545
  and phencyclidine 37
  spider toxins 278
Gravity, and posture control 359
Growth cone navigation –
  adhesion molecules 183, 472
  environmental cues 333
  in zebra fish 18
  mechanisms 257(L)
  regulation by calcium 315
  role of proteases 541
Growth factors –
  and neural tumors 22
  and neurotrophic hypothesis 243, 343
  NGF 299
Gustation, mechanisms 491

H

Hair cells, regeneration 339, 533(L)
Heart, ANF 58
Hermissenda, associative learning in 136
Hippocampus –
  and kindling 33
  LTP 156
  role in learning and memory 152, 163, 170
  spatial memory 244
Hippocampal slices, seizure mechanisms 375
Homeobox expression in mammalian CNS 190
Homeostasis –
  macrophages in nervous system 273
  of calcium 444
Homeotic genes, neural development in *Drosophila* 101
Hormones, and sexual differentiation 54
HTLV-1, and tropical myeloneuropathies 526
Human immunodeficiency virus (HIV) 43
Hypoxic–ischemic injury, calcium-mediated 465

I

Imaging –
  of cytosolic calcium 419
  PET 203
Immortalization of neural cells 6, 307(L)
Immune system, ion channels in 214
Implants, intracerebral 533(L)
Indo-1 419
Information processing, in visual cortex 219
Inhibition –
  in LGN 192
  presynaptic 232, 328
Injury, macrophage response to 273
Inositol phosphates –
  activation of phospholipase C 517
  activation via excitatory amino acid receptors 545
  and calcium homeostasis 444
  signal transduction 3, 336, 338
Insects, auditory system 267
Insulin, in CNS 107
Insulin receptor, signal transduction 3
Invertebrates, ion channel control of behavior 558
Inward rectifiers, magnesium as co-factor 475
Ion channels –
  and G proteins 3
  calcium 1, 90, 425, 431, 453
  calcium-activated cation 69
  expressed in *Xenopus* oocytes 250
  GABA receptor subtypes 112
  in control of behavior 558
  in immune system 214
  in *Paramecium* 27
  magnesium as co-factor 475
  potassium 136 185, 186, 232, 270, 294
Ion transport, sodium pump 325

J

Jellyfish, ion channels and behavior 558
Joints, posture control 359

K

Kainate receptors –
  activation of inositol phosphates 545
  nomenclature 17(L)
Kindling, mechanisms 33
Korsakoff's syndrome, memory impairment in 170

L

L1-like molecules, and neurite extension 183
Lamprey, functional regeneration in 227
Language, and connectionism 192
Lateral geniculate nucleus (LGN), function 192
Lateral line organs, regeneration 533(L)
Learning –
  and LTP 156
  and memory 125
  eye-blink reflex 152
  in *Aplysia* 128
  in *Hermissenda* 136
  motor 147
  nucleus basalis of Meynert 264
  spatial 163, 244
  synaptic rearrangements in 142
Lesch-Nyham syndrome, animal model of 89
Lesions, in visual cortex 394
LHRH, effect on M-current 294
lin-12 mutation in *C. elegans* 259
Locusts, auditory system 267
Long-term potentiation (LTP), and memory 125, 156, 163

M

M-currents 294
Macrophages –
  and viral infection 43
  in nervous system 273
Magnesium, in ion channel function 475
McCulloch, W., and connectionism 9
mdx mutation, and Duchenne muscular dystrophy 89, 480
Mechanoreceptors, somatosensory maps 549
Melanophores, odour response 188
Memory –
  and learning 125
  and LTP 156
  in *Aplysia* 128
  in *Hermissenda* 136
  nucleus basalis of Meynert 264
  spatial 163, 244
  synaptic rearrangements in 142
  working 176
Memory disorders 170
Metabolism, PET studies of 203
Microglia, in nervous system 273
Microscopy, confocal 346
Microspikes, growth cone movement 541
Microtubule-associated

proteins (MAPs) –
and axoplasmic transport 248
and neuronal plasticity 477
Mitochondria, in calcium buffering 438, 449
Modulation –
of calcium channels, 431
of potassium channels 232
Motion detection –
in flies 351
visual cortex function 394
Motor control –
command hypothesis 506
modulation of reflexes 328
posture in weightlessness 359
Motor cortex, output map 501
Motor learning –
eye-blink reflex 152
vestibulo-ocular reflex 147
Motor neurons –
axonal pathfinding in zebra fish 18
sprouting 363
Multiple sclerosis, and tropical spastic paraparesis 526
Musca domestica, visual orientation in 351
Muscle activity, in posture control 359
Muscle disease, Duchenne and Becker muscular dystrophies 480
Myeloneuropathies, tropical 526

N

N-CAM 472
Neocortex, development of 92
Nerve growth factor (NGF) –
and axon outgrowth 363
and neurotrophic hypothesis 243, 343
receptors on Schwann cells 299
Neural development, in *Drosophila* 101
Neural implants, intracerebral 533 (L)
Neural networks, McCulloch-Pitts 9
Neural tumors 22
Neurite extension –
cell adhesion molecules 183
regulation of 315, 363
role of proteases in 541
Neuritic plaque, amyloid deposit in 293
Neurofibromatosis 22
Neurofilaments –
and axoplasmic transport 248
Neurogenesis –
in *Drosophila* 400
parallels with axonal regeneration 94
Neurogenetic disorders, animal models 89
Neuroleukin 343
Neurological disorders –
ALS 51
PD 51
tropical myeloneuropathies 526
Neuromuscular development, zebra fish 18
Neuron doctrine of Cajal 521
Neuroscience, and philosophy 304
Neurotoxicity – calcium-mediated 465
Neurotoxins – affecting
excitatory amino acid transmission 278
for characterization of nAChR 73
Neurotransmitters –
expression in developing neocortex 92
release 241,458
trophic effects of 533 (L)
Neurotrophic factors 243, 343
NMDA receptors –
activation of inositol phosphates 545
activation of phospholipase C 517
and calcium neurotoxicity 465
and LTP 156
and phencyclidine 37
nomenclature 17 (L)
Nomenclature –
amino acid receptors 17 (L)
PCP and sigma receptors 388 (L)
Nucleus basalis of Meynert 264

O

Odorant-binding protein 471
Odorants, sensory transduction 188
Olfactory transduction –
mechanisms 532 (L)
receptors 188, 471
Oncogenes –
and neural tumors 22
immortolization of neural cells 6
ras 287
Oocyte expression system 41, 250
Opioid receptors, distribution in CNS 308
Organotypic tissue culture 484
Ouabain, and neural cell line establishment 307 (L)

P

p21-*ras*,
as G protein 287
Parallel distributed processing, and human language 195
Paramecium, ion channels in 27
Parkinson's disease (PD) –
environmental aetiology 51
PET studies 203
Parvalbumin, in calcium buffering 438
Pattern formation, homeobox expression in CNS 190
Peptides –
ANF 58
FRMF amide 232
insulin 107
LHRH 294
Perception –
motion 394
visual 219, 380
Perceptions, Warren McCulloch 9
Phencyclidine (PCP) –
biochemistry and physiology 37
receptor nomenclature 388 (L)
Philosophy, and neuroscience 304
Phosphoinositides, signal transduction 3, 336, 338
Phospholipase A_2, arachidonic acid second messengers 117
Phospholipase C, activation by calcium 517
Phosphorylation, of neurofilaments 291
Photoreceptor, differentiation 515
Plaque, amyloid deposit in 293
Plasminogen activator, and neurite extension 541
Plasticity –
differential expression of MAPs 477
in learning and memory 125
of ion channels in immune system 214
synaptic rearrangements in learning and memory 142
Play, sexual differentiation of 54
Positron emission tomography (PET), and Parkinson's disease 203
Postural control, in weightlessness 359
Potassium channels –
and $GABA_B$ receptors 112
biochemistry 186
kinetic models of 270
M-currents 294
magnesium as co-factor 475
modulation of 136, 232
structure 185
Prefrontal dysfunction in schizophrenia 367
Presynaptic facilitation, and ion channel modulation 232
Presynaptic inhibition, modulation of reflexes 328
Processing streams, in visual cortex 219
Proteases, and neurite outgrowth 541
Protease inhibitors –
and amyloid precursor protein 293
and neurite outgrowth 541
Protein synthesis, in dendrites 342
Proto-oncogenes, *ras* 287
Psychiatric disorders, schizophrenia 367
Psychology, and neuroscience 304
Psychotomimetic effects phencyclidine 37

Q

Quisqualate receptors –
activation of inositol phosphates 545
nomenclature 17 (L)
spider toxins 278

R

ras, proto-oncogene 3, 287
Receptors –
acetylcholine 73
adrenergic 321
ANF 58
cloning by oocyte expression system 41
dihydropyridine 425
excitatory amino acid 278, 465, 517, 545
expressed in *Xenopus* oocytes 250
GABA subtypes 112
5-HT 496
in olfactory transduction 188, 471
insulin 107
measured with PET 203
NGF 299
NMDA 156
opioid 308
PCP 388 (L)
ryanodine-sensitive calcium channel 453
sigma opiate 37, 388 (L)
taste 491
Reflexes, modulation of 328
Regeneration –
functional, in lamprey 227
hair cells in inner ear 399, 533 (L)
in vertebrates 94
Retina –
amacrine cells 405
Cajal's studies of 521
ganglion cells 87
motion patterns in visual orientation 351
Retroviruses –
as cell lineage markers 6, 46
HTLV-1-associated myeloneuropathies 526
Ribosomes, in dendrites 342
RNA transport in dendrites 342
Rod outer segments 117
Ryanodine receptor 453

S

Sarcoplasmic reticulum, ryanodine receptor 453
Schizophrenia, and frontal cortex 367
Schuetze, Stephen M., obituary 212
Schwann cells –
NGF receptors on 299
tumors of 22

Second messengers –
and ion channel modulation 232
arachidonic acid metabolites 117
calcium 415
in conditioning 128, 136
Segmentation genes, neural development in *Drosophila* 101, 378
Seizures –
cellular mechanisms 63
kindling 33
mechanisms 375
Senile dementia, β-carboline treatment of 13
Senile plaques, amyloid deposit in 293
Sensorimotor coordination, posture control in weightlessness 359
Sensory transduction –
auditory system 267
gustation 491
olfaction 188, 471, 532 (L)
Serotonin, see 5-hydroxytryptamine (5-HT)
sevenless mutation 515
Sexual differentiation of social play 54
Shaker mutation 185
Sigma opiates 37, 388 (L)
Signal transduction –
and ion channel modulation 232
arachidonic acid metabolites 117
G protein-mediated 3
in conditioning 128, 136
inositol phosphates 336, 338, 444
mechanisms of taste 491
p21-*ras* 287
Paramecium behavior 27
Skin, somatosensory maps 549
Snake venom, neurotoxins 73, 186
Social play, sexual differentiation of 54
Sodium/calcium exchanger, in calcium buffering 438
Sodium channel, homology with calcium channel 1
Sodium pump, molecular biology of 325
Somatosensory system –
representation of form 373
variation in maps 549
Space, posture control in weightlessness 359
Spatial form, represented in somatosensory system 373
Spatial learning and memory 163, 244
Spatial vision, in cats 78
Spider toxins, affecting excitatory amino acid transmission 278
Spinal transection, functional regeneration following 227
Sprouting, in motoneurons 363
Substance K, receptor cloning 41
Substratum adhesion molecules, in *Drosophila* 472
Synapsin I, and neurotransmitter release 458
Synaptic plasticity –
in learning and memory 142, 163
LTP 156
Synaptic vesicle-associated proteins, molecular biology of 241
Synaptic vesicles, and calcium distribution 449
Synaptogenesis, and sprouting 363
Synaptophysin, 241, 458

T

T cells, ion channels in 214
Tachykinin, substance K cloning 41
Taste transduction, mechanisms 491
Tau protein –
and axoplasmic transport 248
and neuronal plasticity 477
Techniques –
confocal microscopy 346
oocyte expression system 250
organotypic culture 484
Tissue culture, organotypic 484
Toxicity, calcium-mediated 465
Transmitters, see neurotransmitters
Triazolam, effects on circadian clock 535
Trisomy 16 and Down syndrome 390
Trophic factors, and axon outgrowth 363
Tropical myeloneuropathies, aetiology 526
Tumors, glial 22

V

Vesicles, synaptic –
and associated proteins 241
and calcium distribution 449
and neurotransmitter release 458
Vestibulo-ocular reflex, motor learning 147
Video imaging, of cytosolic calcium 419
Viruses –
and CNS 43
HTLV-1-associated myeloneuropathies 526
Vision, spatial 78
Visual cortex –
organization 380
processing streams in 219
Visual system –
amacrine cells 405
lateral geniculate nucleus function 192
Voltage-gated channels, structural features 1

W

Weightlessness, posture control in 359
Working memory 176

X

Xenopus oocyte expression system 250

Z

Zebra fish, axonal pathfinding 18
